IDENTITY THEFT SERVICES

Identity theft is scary. You don't have to navigate it alone.

Identity theft can happen when you least expect it. Fortunately, Revive is here to help you recover and protect yourself against future threats.

Identity Theft Program

Identity theft happens when someone uses your personal information — like your Social Security number — to open accounts, make purchases, or claim a tax refund. It can cost you more than money. You could lose access to medical care, services, or even a job.

Our ID Theft Program helps you understand the risks and how to protect your information. And if identity theft happens to you, we'll help you recover.

Our trained coaches explain the difference between a data breach and the nine most common types of identity theft. They'll also walk you through common scams, such as phishing and skimming, and how to protect yourself.

We also offer **two guides from our financial coaching team:**

ID Theft Resource Guide

Helps you identify the type of identity theft you're facing, outlines your first steps, and lists free credit monitoring options.

Recovery Guide

A step-by-step plan for recovering from identity theft, with immediate and next steps, form letters, and a way to track your progress.

CONFIDENTIAL:
Your privacy is protected. Nothing is shared without your permission.

COST:
This program is a free service paid for by your employer.
